Are you tired by seeing this daily volatility in stock market and confusing about investing and trading in stock market?

Here is the solution.....

Invest 25000/- and Be Crorepati in 1 year

We at CNifty Guru always believe in improving our services.

These efforts are towards empowering our Clients to fight the battle of bulls and bears to emerge out to be winner.

As everybody knows 95% of the people lose money in the stock market. All our efforts are delivered to ensure that our Clients should be in the 5% who make Profits, Profits and only PROFITS.

At CNifty Guru we have developed a **derivative-option strategy**. In every month there are chances of earning maximum money, Nifty Guru call this days as **Golden Days** where returns are more than 100% to 200% of your investment, in Nifty Options, these chances are given by FII Operators and Hedge Funds that operate stock market as they want.

As per our Nifty Option strategy (either call or put) any sudden up or down move of nifty will give us returns in multiple times (2 times to 4 times) within 4-5 days, every month there are one or two such chances of nifty movement, which we are catching exactly. We are mainly invested in nifty options and our maximum waiting period is 4-5 days for getting profits.

We do Nifty Option trades once or twice in a month for gaining maximum profits. **And we do not believe in intra day trading, as they are less profitable, stressful and it is very difficult to win everyday in stock market by doing intra day trading.**

Now let us come to the point, that how we can earn billions in Nifty Option market, as we are considering that a vertical nifty move (upside or downside) of Nifty can give us 100% to 400% returns.

Let us assume that we give 1 call each month and you are investing Rs. 25,000/- & it becomes Rs 75000/- , then in next month first we take out our initial capital invested i.e. Rs 25,000/- and re-invest Rs. 50000/- which becomes Rs. 150,000/- again we keep a side Rs. 50,000/- and re-invest Rs. 100,000/- and keep doing this for first six months, after six months we want invest safely so we will invest Rs. 800,000.00 out of returns and keep balance aside for next 7 months, at the end your investment of 25K will become Rs. 14,375,000.00 (One Crore forty three lakh seventy five thousand only)
